THE PICK OF PIPE TOBACCO'S

An Agency for Peace

THE PHRASE "ONE WORLD" has been used in many connections in recent years and it has become very familiar to us all. It has now been taken up by the United Nations Educational, Scientific, and Cultural Organization which has summarized its objective as "to make the peoples of the world live not think in terms of one world." It is possible that this organization, in which forty-four countries are represented, may have a far-reaching effect on the future outlook of many thousands of people, for it plans to work through development of education, science, and adult education leaders to promote international understanding and stamp out narrow nationalisms.

To Break Down Many Barriers

An international radio network and of breaking down barriers in other fields associated with the exchange of information and ideas. Mr. Herman Vanden, one of the Canadian representatives to the recent meeting of U.N.E.S.C.O., pointed out in an interview at the conclusion of the gathering that it must be remembered that the organization does not wish to interfere with the art or culture of any country, but only to take the "age-old theme of tolerance, understanding and friendship."

A Hopeful Sign For The Future

Prime Minister Attlee once said that "war is made in the minds of men." Few people need to be reminded of the powerful part played by the mind in the building up of the Nazi regime in Germany. It is now a hopeful sign for the future peace of the world that the importance of education in breaking down prejudice and misunderstanding has been recognized, and that practical steps are being taken to use it as a means of preventing future wars. One very commendable and practical undertaking of the organization is the plan to launch a campaign to raise \$100,000,000 to rebuild schools and provide educational equipment in the war-devastated countries. It is probable, however, that the work will be made at the recent meeting held by U.N.E.S.C.O. will be felt here and in other lands, and it is to be hoped that its undertakings will meet with the interest and support which they deserve.

Man Who Refused To Lower Union Jack Is Honored

United Kingdom Has First Radar Controlled Port

OTTAWA.—The man who refused to leave the Union Jack at Singapore has been knighted by the British Empire. Sir John G. Stewart, a Canadian, was knighted by the British Empire.

It is Lt.-Col. Arthur Robert Stewart, commander of the 1st Canadian Parachute Battalion, who was the first to plant the Union Jack in Singapore in 1945. It is the only flag of the United Kingdom to have been planted in the city. He was knighted by the British Empire.

The United Kingdom is about to have the first radar-controlled port in the world, reports the Empire. The port, which handles a large part of the world's trade, is being built in the city of London. It is the only port in the world to have a radar-controlled port.

An ostrich can be seen so fast that it can be seen in his neck at the same time. It is the only ostrich in the world to have a radar-controlled port.

Prof. Murray Magnay, a professor at Dalhousie University, is the only professor in the world to have a radar-controlled port.

CANADA BIGGEST U.S. CUSTOMER

Taking Goods At Rate Of \$130,000,000 A Year

WASHINGTON.—Canada's prominence among all other nations in U.S. foreign trade is underlined in a review published here which projects annual figures for the basis of the volume of shipments reached at the end of 1947. The figures show Canada taking 18 per cent of all U.S. exports valued at \$130,000,000, or nearly 20 per cent of its imports.

As the biggest customer, Canada is shown taking U.S. goods at the rate of \$130,000,000 a year, while selling at the rate of \$100,000,000. Total U.S. exports are running close to \$200,000,000 with imports at the rate of \$400,000,000.

Canada is among leading purchasers of U.S. industrial machinery, automobiles and automobile parts and accessories. The country's imports of machinery, three-fifths of its imports are going to Canada. Primary exports are going to Canada, France, Mexico, Brazil and Russia. Canada, Argentina, and Brazil, in that order, are shown as the largest purchasers of automobiles and accessories.

Crash turn tables into fine crumb. Best egg yolks until thick and milk, dry ingredients and shortening stir until combined. Fold in stiffly beaten egg whites. Bake in hot water until brown and crisp. Yield: 7 waffles (4 1/2 inches in diameter).

At the top of the list of U.S. imports are paper and paper base stock, with Canada supplying more than 50 per cent of the annual total of \$400,000,000. Sweden and Finland are the only other important sources.

The volume of Canadian purchases from the U.S. has risen in the last ten years, the present rate being three times that of 1937. But Great Britain has slipped, both as a market for and supplier of U.S. trade.

Second only to Canada among industrial nations as a purchaser of U.S. goods is the United Kingdom, which takes more than \$200,000,000 of U.S. goods annually.

FUNNY AND **

It was the young soldier's first big wedding and he had to give an old lady from the rearview seats. Nervously he tapped her on the shoulder and then said with a rush: "Madam, my friend, Your excellency the wrong pal. You are you in another state?"

Juggins: "How do you get on with the boss, old man?"

Furgine: "Right about face, me old man!"

Juggins: "It's bad the legs since of the wheelchair so I can't go to work."

The bank robber asked the three henchmen around the neck of the bridegroom: "What's the bride for a present?"

"Oh, dear," she exclaimed, "I'd give you a ring on a chain for a present."

"Excellent!" exclaimed the happy groom. "I'll give you a chain for the wedding at home instead of 2."

"What's the best time at 3?"

The Irish, a cross-country affair that stopped at all stations and was a success for the bride and groom.

"Look here, sir," he said to I of his messengers as he returned to the house.

"Is he really?" replied the groom. "I'm sure you're small enough when we started."

Bill was busy at his desk when a friend called.

"From your group—I don't know if you're with the chemicals party."

Bill (politely): "I didn't know you were in the chemicals party."

OUR UNEMPLOYMENT INSURANCE FUND UP

OTTAWA.—Though payments from Canada's unemployment insurance fund went over the \$200,000,000 mark last year, the fund swollen by a net \$18,000,000, the unemployment insurance commission announced.

Balance in the fund at the end of 1946 was \$212,000,000, a smaller increase in the fund than was the case in 1945.

The heavy rise in benefit payments, however, was offset by a smaller increase in the fund than was the case in 1945.

Employer-employee contributions amounted to \$46,900,000, compared with \$40,000,000 the year previous. Regular government contributions were \$18,000,000, compared with \$18,000,000 the year previous.

In addition, two special contributions by the federal government aggregated \$24,000,000. Out of \$20,000,000 was to cover time spent in the armed forces unwilling to volunteer for charge until unemployment insurance after becoming established in 10 days of unemployment.

The other \$4,000,000 was to provide credits for welfare subsidies and to provide for the unemployed insurance act.

Interest on government investments brought the fund \$27,000,000 last year, compared with \$25,000,000 in 1945.

Export Of Certified Seed Potatoes up

One of the largest producing areas of certified seed potatoes in that of the North Atlantic states of the three Maritime provinces of Canada, New Brunswick, Nova Scotia, and Prince Edward Island, has been reported by the federal government.

The United States usually takes about one million bushels annually of Canadian certified seed potatoes. Even by the end of 1946, sales in the United States and other countries were up to 1,200,000 bushels.

According to a recent report received by the Maritime Provinces and the three New England States mentioned, the total certified seed potatoes in 1946 in the United States was 1,200,000 bushels.

FERTILIZER COMBINATION
Fertilizer combination in the United States in 1946 was more than 100,000 tons, according to a report by the U.S. Department of Agriculture.

FOOD COMBINATIONS
Pointing out that a diet of 100 to 150 pounds of food is a perfect, self-sufficient food, nutritionists have found that a diet of 100 to 150 pounds of food is a perfect, self-sufficient food.

WORLD HAPPENINGS

BRIEFLY TOLD

Auctioned for the Dover Battle of Britain—A 1939 touring car brought £200 (400).

The Royal Indian Navy is to get three ships of the *Leader* class commission in 1947. They are the *Admiral*, *Albatross* and *Leander*.

Finland thus has delivered one third of reparations valued at \$100,000,000 to the Soviet union. It was announced officially.

The Soviet Navy Agency has reported the discovery of rich new radioactive deposits in the Don and northern Donets valleys.

Dublin harbor is having its first boom since 1938 and continues and shipping companies are working overtime to clear shipments.

One thousand Dutch families are allowed to immigrate to Brazil for farm settlements, according to an agreement between the governments of Brazil and the Netherlands.

LONDON—Princess Elizabeth has been elected an honorary member of the Institution of Civil Engineers, the oldest civil engineering institution in the history of the world.

Strange Hobby Of Training Roosters To Roller Skate

Making Violin And Clothes Spinners Are Other

PITTSBURGH—Finding out about strange hobbies of other people is a hobby with Edwin A. Rowland.

Take the man in Redwood Beach, Del., who fancies roosters to roller skate.

"He makes the skates by hand," Rowland said, "and it took him months to teach each rooster how to balance. At the end of seven years they could skate on a little track in his back yard."

Rowland said the man was considering charging 25 cents admission to see roosters skate in military formation, as soon as he can teach them how.

In De Bo, Pa., a high school boy has turned a baby's cry into profit. An accomplished mimic, he learns a baby's cry. For 30 cents a shout-up, he can make a baby sob crying in less than a minute by mimicking its cry. Her earnings of \$450 last summer represent a modest baby.

To Minnesota, Rowland discovered an 80-year-old farmer who retired from practice to devote his time to making violins. The octogenarian has made violins now being used in five major symphony orchestras in the United States. Thus far he has turned out 125 violins.

A nurse gave up her profession to dress dolls in the latest fashions, and clothes sprinklers out of rags but she has the dolls.

Rowland now hobby is collecting autographs of famous persons. In all he has 3,071, "all prominent and all famous."

Among his proud autographs is a bracelet of Alan of Wales and the well-known paws of Ginger. Admiral Byrd's lead dog at the South Pole.

AVOIDING COLDS

Here's the way National Health authorities suggest you may avoid respiratory infections—start coughing during cold weather; regularly, having well-balanced meals; sleep in well-ventilated rooms; dress out of the atmosphere by deep breathing and play every day from obvious signs of sore throat and head cold.

GOVERNOR BACKS MILITANT MOOSE

WASHINGTON—Governor Ernest Gruening of Alaska today took as a defender of Alaska's militant Moose even if they do.

Attack brasses of the engine and make a force of railroad men to encourage.

Gruening rejected a request by Col. John J. Johnson, manager of the Alaska Railroad, that Moose who make pests of themselves be reduced to encourage.

"The delay is not sufficiently serious to warrant jailing those noble animals whose presence on the railroad, while a seasonal handicap to speedy transportation, is more than a compensating feature as an attraction to tourists in the summer time," Gruening said in a replying telegram.

Johnson, obviously not at all delighted by the delay, complained that on Jan. 10 alone they caused 11 schedule delays and out of control.

Britain Receiving Ivory From Africa

Elephant tusks are being shipped again from Africa, and London ivory market, the centre of world trade in polished ivory tusks, billiard balls and buttons is booming.

Prices have jumped considerably since previous auctions, with tusks now bringing \$100 to \$200 per hundred pounds, according to the market.

CHICAGO YOUTH GETS NEW FACE

GRAND RAPIDS, Mich.—David Smith, 16-year-old Chicago boy who admitted attempting to assault a woman in a hotel, was given a new face by a plastic surgeon.

The operation was performed Jan. 12 by Dr. Frank Smith, a plastic surgeon, who said the boy's face was so badly damaged that it was necessary to reconstruct it.

David left Grand Rapids in company with relatives. Dr. Smith said the boy's face was so badly damaged that it was necessary to reconstruct it.

David was seen here in the morning every day since the operation during changes of dressings. Dr. Smith explained, and has frequently expressed "light" over the results.

He said that the structure of bones and muscles originally had given the boy a perpetual scowl of a particularly ferocious nature.

PREDICTS SUCCESS IN CANCER RESEARCH

NEW YORK.—The problem of cancer will be solved within five years, Elmer Robert said in accepting the chairmanship of the American Cancer Society's drive to raise \$12,000,000 for a concentrated attack on the disease.

Robert is not a medical man, but he is a respected authority on cancer. He said that within five years he would be able to lead the fight against the disease.

NAKING GOVERNMENT IGNORES DAMAGE DONE BY EARTHQUAKE IN SOUTH HOPEI PROVINCE

LANCHOW, China.—This town in southern Hopei Province has four earthquake tremors every 10 days since September 1920. The last earthquake quaked 70 per cent of the houses and the government people can't get the government of China to do anything to help.

Even the Chinese government, who were attacking the city during the September quake didn't believe it was a real tremor. They thought that the Chinese Nationalist Government had obtained an atomic bomb and dropped it on the city. They said, "Don't, you see, we are all here."

There was no record of such casualties at first because fighting broke out. The two forces resumed their morning. Later, during a cease-fire, the government revealed that there were 240,000 victims, including killed, injured and property damaged by the earthquake. A total of 464,110 homes were wrecked.

Yet when Nanking officials first were approached for a relief appropriation to help rebuild the area, the government denied any knowledge of the disaster. Delegates from Lanchow asked the government for at least \$2,000,000,000. Finance Minister T. V. Howe replied that the government of \$200,000,000 which the delegates refused to accept because they considered it too small to the people of Hopei.

The province itself scraped up \$2,000,000, Chinese Nationalist delegates the estimated cost of the disaster at \$20,000,000. The government of the United States, which has at present price level, would have to contribute \$20,000,000. But UNRRA and CNRRA have contributed money and other relief.

The quake covered an area 50 miles north and south, 20 miles east and west of Lanchow. It killed the population of 1,500,000 was seriously affected. Most of these made homeless have moved in with already overcrowded relatives or are living in holes built of adobe. A few have been able to escape temporary repairs to their damaged homes to make them livable.

The Kailan coal mines were partly wrecked by the shock. It was not the first time that Lanchow has been the center of an earthquake area. The last time was 400 years ago during the reign of the Manchou Emperor, Tung Chih.

CREAMERY BUTTER STOCKS INCREASED

OTTAWA—Canada's domestic butter output has risen to 3,500,000 pounds brighter than the first days of a year ago when the weekly industrial register fell to four months of its average.

The bureau of statistics reported that stocks of creamery butter in the principal cities totalled 17,435,120 pounds on Feb. 1, compared with 13,965,164 Feb. 1, 1944. Stocks on hand in 1944 totalled 20,460.

Actually, however, the main reason for Canadian output concerning butter was still the 8,000,000 to 10,000,000 pounds from New Zealand, shipments of New Zealand butter are expected to reach Canada shortly.

STYLES ARE CHANGING
NEW YORK—Brides of 1947 may wear their pallidus or gold wedding rings in their ears, as well as on their third finger, left hand, reports M. Rosen, jewelry designer. "The sentimental rings," he writes, are "the new thing in the jewelry trade, and match their wedding bands these said."

RESERVE ARMY CAMP
EDMONTON—Plans are complete for the first winter camp in Canadian reserve army history which will take place in the Watrous area Feb. 17-28.

QUESTION OF FLAG DESIGN DEFERRED

OTTAWA—The controversial question of a design for a distinctive Canadian flag is the subject of a committee report at the current session of parliament in Ottawa.

The committee, which was set up by the government, has been working on the question since the last session of parliament. It has held several public hearings and has received many suggestions.

At the last session of parliament a committee of the House of Commons recommended that the red flag, with a golden maple leaf replacing the cross of arms in the fly, be chosen as Canada's flag. The committee also recommended that the flag be adopted by the government.

Several House members were opposed to the committee's recommendation. They argued that a distinctive Canadian flag should not be chosen until the United States flag is changed.

Extension Of Emergency Powers Sought

OTTAWA—Extension of about 30 of the government's emergency powers is being sought by the government. The extension would allow the government to control prices, supplies and rentals, and to enforce a limited time from parliament.

The extension would also allow the government to control the production and distribution of goods and services. It would also allow the government to control the movement of people and goods.

Further government legislation, the prime minister said, will include a bill amending the industrial disputes act. This bill would give the government the power to control the production and distribution of goods and services.

The bill would also give the government the power to control the movement of people and goods. It would also give the government the power to control the production and distribution of goods and services.

On the labor relations legislation, Mr. Smith (C.P.F.) said that he wanted to know if members could get copies of the material set up by the labor code.

"The bill already has been distributed to manufacturers' organizations and labor organizations," he said. "Would it not be possible for members of parliament to be shown the same copy?"

Labor Minister Mitchell was not answerable. He said that the bill was being considered by the government.

Mr. King said that the bill was being considered by the government. He said that the bill was being considered by the government.
